

## Conference Organization

### Chief Patrons

- Shri Manoj Gaur, MD, Jaypee Group, India
- Prof. S. C. Saxena, Pro-Chancellor, JIIT, Noida, India

### Patron

- Prof. Bodh Raj Mehta, Vice-Chancellor, JIIT, Noida, India

### General Co-Chairs

- Prof. Sartaj Sahni, UFL, USA
- Prof. Vikas Saxena, JIIT, Noida, India

### Program Chair

- Prof. Sanjay Ranka, UFL, USA

## Track Co-Chairs

### Track-1: Intelligent Computing

- Bharat Rawal, Grambling State University, Louisiana, USA
- Durga Toshniwal, Indian Institute of Technology Roorkee, India

### Track-2: Network and Social Computing

- Azzedine Boukerche, University of Ottawa, Ontario, Canada

### Track-3: Data and Cloud Computing

- Ana Gainaru, Oak Ridge National Laboratory, USA

### Track-4: Computer Algorithms and Applications

- Jose Rolim University of Geneva, Switzerland
- Theofanis Raptis, Institute of Informatics and Telematics, National Research Council of Italy

### Track 5: System and Software Engineering

- Pradeep Chowriappa, Louisiana Tech University, LA, USA

## Important Dates

- Full Paper Submission: 30<sup>th</sup> April 2025
- Author notification: 1<sup>st</sup> June, 2025
- Final Camera Ready Submission: 5<sup>th</sup> July, 2025

*For any query, please contact*

*Dr. Sandeep Kumar Singh*

*Dr. Bhawna Saxena*

## CALL FOR PAPERS

### 2025 Seventeenth International Conference on Contemporary Computing (IC3-2025), August 7-9, 2025

[IEEE Conference Record Number: 66947]

**Conference Mode: HYBRID (Online and Offline)**

**Applied for Technical Co-Sponsorship from IEEE Computer Society, USA and IEEE Technical Committee on Parallel Processing (TCPP), USA**

*Jointly organized by*

**Jaypee Institute of Information Technology, Noida, India & University of Florida, USA**

<http://www.ic3conf.net/index.html>

The International Conference on Contemporary Computing (IC3) is being jointly organized by **Jaypee Institute of Information Technology, Noida, India** and **University of Florida (UFL), Gainesville, USA** annually since 2008. The conference tracks characterize core developments in contemporary areas of computer science. Like past fourteen editions, IC3-2025 also aims to bring together researchers and practitioners from academia, industry and government to deliberate upon the *Intelligent computing, Network and Social computing, Data and Cloud computing, Computer Algorithms and Applications, System and Software Engineering* aspects of contemporary computing. Every year the conference also features multiple eminent keynote speakers from academia and industry as well as presentations of more than 100 peer-reviewed research papers and exhibits. From 2009 onwards, the IC3 proceedings are indexed by DBLP, SCOPUS, and Google Scholar. According to Google Scholar, IC3's current h5 index is 20 and h5 median is 38.

The publishers of the previous proceedings have been ACM ICPS (2021 - 2024), IEEE Xplore USA (2013-2019), CCIS-Springer, Germany (2009-2012), and McMillan, India (2008). IC3-2024 proceedings can be accessed at <https://dl.acm.org/doi/proceedings/10.1145/3675888>

## Conference Tracks

Original unpublished research that is not being under review considerations elsewhere are invited for possible publication under one of the following five tracks of the conference.

1. Network and Social Computing Track
2. Computer Algorithms and Applications Track
3. Data and Cloud Computing Track
4. Intelligent computing Track
5. System and Software Engineering Track

**List of topics of each track (but not limited to)** are given on next page.

**Paper Submission Guidelines:** All papers will be submitted through EDAS using following link <https://edas.info/33536>. Authors may visit the page <https://www.ieee.org/conferences/publishing/templates.html> for preparation of manuscripts for review of the work that demonstrates original unpublished research. Word Template File is also uploaded on the website. Authors are advised to ensure that their papers are free of intentional as well as unintentional plagiarism. All submitted papers will be checked for the similarity score with the published literature using *iThenticate* services by EDAS. Papers with similarity score of more than 20% and AI-generated content of more than 20% are likely to be desk rejected. Other papers will be peer reviewed on the basis of their clarity, originality, relevance and significance.

*Topics of interest for each of the tracks but not limited to*

<b>Track-1: Intelligent computing</b>	<b>Track-2: Network and Social Computing</b>	<b>Track-3: Data and Cloud Computing</b>	<b>Track-4: Computer Algorithms and Applications</b>	<b>Track-5: System and Software Engineering</b>
